

Mohamed Oussema Boussida

Full-Stack & DevOps Engineer

☎ +216 54007403 ✉ medousseboussida@gmail.com 🏠 Tunisia, Ariana 🔗 [LinkedIn](#) 🐙 [GitHub](#)

Education

ESPRIT School of Engineering

2021-2026

Engineer's degree, Specializing in Web and Internet Technologies.

Internships

Full-Stack & DevOps Engineer Intern [Axio](#)

01/2026 - 07/2026

- Redesigned and rebuilt the entire Gamefy Academy website from scratch, delivering a modern, scalable architecture.
- Strengthened platform security by building a custom authentication and role-based access control system with Spring Security.
- Enhanced application performance and optimized reservation handling by implementing a Redis-based caching system.
- Enhanced the user experience by integrating a RAG-based LLaMA AI chatbot capable of conversational interaction and personalized reservation recommendations.
- Streamlined software delivery and improved code quality by building an end-to-end CI/CD pipeline, automating build, unit testing, security scanning, deployment, and monitoring workflows.
- Tools:** React.js, Spring Boot, PostgreSQL, Github Actions, Docker, SonarQube, Snyk, Aqua Trivy, Grafana and Prometheus.

Full-Stack & DevOps Engineer Intern [Axio](#)

06/2025 - 08/2025

- Enhanced administrative efficiency by developing an admin dashboard for the Gamefy Academy website.
- Integrated Firebase Authentication to strengthen application security and improve the user authentication experience.
- Integrated a CI/CD pipeline to ensure faster and more reliable delivery of updates.
- Tools:** React.js, Spring Boot, MongoDB, Jenkins, SonarQube, Docker, Grafana and Prometheus.

Mobile Developer Intern [Bee Coders](#)

07/2024 - 08/2024

- Designed and developed a mobile application that gathers IT news and events in Tunisia.
- Tools:** Flutter, Node.js, Express.js and MongoDB.

Web Developer Intern [Click Erp](#)

06/2023 - 08/2023

- Developed a functional CRUD module for the ClickErp's platform.
- Tools:** WordPress, PHP, JavaScript, and MySQL.

Technical Expertise

Front-end: Angular, React.js, Next.js, Tailwind CSS, Flutter.

Back-end: Spring Boot, Express.js, Laravel, Django.

DevOps: Jenkins, GitHub Actions, Docker, SonarQube, Aqua Trivy, Prometheus, Grafana.

Databases: MongoDB, MySQL, SQLite, PostgreSQL.

Others: Git, UI/UX, Ubuntu, Firebase, FlutterFlow

Academic Projects

UrbanGreen | **Laravel, MySQL, Jenkins, Docker, SonarQube, Grafana, Prometheus**

- Developed a platform that promotes the greening of urban areas to improve the quality of life in cities.
- Implemented a full CI/CD workflow automating build, test, deployment and monitoring.
- Developed an AI chatbot using a locally hosted LLM via Ollama.

EspritCare | **MERN Stack, Python, Jenkins, Docker, SonarQube, Grafana, Prometheus**

- Designed and developed a secure and efficient platform for ESPRIT to manage psychological support for students.
- Implemented an end-to-end CI/CD pipeline to automate build, test, deployment and monitoring.
- Built an AI-powered model to evaluate student mental health and provide personalized recommendations.

Kaddem | **Jenkins, Docker, SonarQube, Nexus, Grafana, Prometheus**

- Built a full CI/CD pipeline for a Spring Boot application to automate build, testing, deployment and monitoring.

EspritMarket | **Symfony, JavaFX, MySQL, FlutterFlow, Firebase**

- Designed and implemented a multi-platform application (Desktop, Web and mobile) for managing a Grocery store.

Certifications

- Hashgraph Developer - [Hashgraph Association](#)
- AWS Academy Graduate - [AWS](#)
- Graph Developer - [Apollo GraphQL](#)

Languages

- English** - B2
- French** - B2
